PROFESSIONAL SUMMARY

Product Manager, 5 years across enterprise SaaS, data intelligence and industrial platforms. Built iOL Pulse from scratch, now running across **500+ hotel chains and 45,000+ properties**; before that grew a factory OS to **20,000+ monthly users across 280 plants**. I settle the data model and metric dictionary before anyone designs a screen.

PROFESSIONAL EXPERIENCE

Product Manager | iOL | Gurugram, India Sep 2025 - Present

- Built iOL Pulse from scratch, a real-time data intelligence platform for enterprise hotel chains, now running across a network of 500+ chains and **45,000+ properties**. Own vision, strategy and roadmap, and took **7 modules from blank page to production in 12 months**, running prioritisation and roadmap reviews with Engineering, UX, Data and Sales.
- Cut competitive pricing decisions from **6-8 hours of manual comparison to under 5 minutes** by shipping Compsets, which benchmarks demand share, conversion, ADR and retention against a property's comp set, quantifies the revenue at stake and names the lever behind each gap rather than leaving revenue teams to interpret charts. Built off discovery with 10-15 revenue managers.
- Revenue managers were piecing rooms revenue, ADR, room nights and pace together from four disconnected reports. Consolidated those into one large-scale dataset and launched Revenue Insights, a single surface covering pickup and pace, feeder markets, channel mix and rate parity, with the data model settled with revenue, engineering and UX before design began.
- Prototyped Pulse Assistant, a natural-language agent over the Revenue Insights API: 5 of 5 filters resolved from one sentence in **5.8 seconds** on a traced run. The model composes the query, the pipeline computes every figure, and guest PII and forecasts are refused at the guardrail.

Product Manager | Df-OS (NRV DesignX) | Noida, India Dec 2022 - Sep 2025

- Scaled Df-OS, a digital factory operating system, across 31 global manufacturing brands and 280 factories to **20,000+ monthly active users**, with adoption up 35% YoY and annual revenue more than doubled. Owned the roadmap and commercial case, sequencing 100+ features against a quarterly business review with Sales, Finance and leadership.
- Rebuilt onboarding after analysis across 50+ daily signups showed users stalling between module creation and first live process. A/B tests and behavioural segmentation cut drop-off **25%** and lifted 30-day engagement 28%.
- Ran go-to-market for 3+ platform modules through staged rollouts, early-adopter cohorts and a closed-loop feedback programme with Sales and Marketing. First-week adoption landed **30% above prior launches**.
- Every new data view needed an engineering ticket and a release cycle. Specified a config-driven API layer that turns a new drilldown into a config file instead, so the team could add views without shipping code, and used SQL instrumentation to pick which ones earned their place. Web and mobile conversion rose **18%**.
- Sat with client operations teams through requirements, demos and rollout, turning how each plant actually runs on the floor into product requirements. Owned the reporting and review cadence that kept those accounts aligned from one release to the next.

Business Analyst | YCSPL | Gurugram, India Sep 2021 - Dec 2022

- Delivered GIS-based digitisation of **4.5M+ properties across 82 towns** for the Directorate of Urban Local Bodies, Government of Haryana, lifting municipal tax compliance 30-35%. Owned the backlog end to end, turning messy field survey operations into epics, specs and deployment stories engineering could build from.
- Took 35 town deployments live, running requirements and feedback loops with 40+ distributed field teams and briefing Directorate-level leadership on progress and trade-offs. Error resolution improved **76%** across successive cycles.

CORE SKILLS

Product: Product Strategy, Roadmap Planning, 0-to-1 Product Development, Product Discovery, Feature Prioritisation, PRD Writing, OKR Setting, GTM Strategy, Business Case, Systems Thinking

Execution: Agile, Scrum, A/B Testing, Experimentation, User Research, Cross-functional Leadership, Executive Communication

Data: SQL, Large-scale Datasets, Metric Definition, Mixpanel, Grafana, Behavioural Analytics, Advanced Excel

AI: LLM Productisation, Function Calling, Tool Contracts, Prompt Design, Guardrail and Threshold Design, Dify

Tools: Figma, Jira, Confluence, Notion, Postman, Whimsical

EDUCATION & CERTIFICATIONS

B.Tech, Uttaranchal University, Dehradun CGPA 8.1 | 2020

Certified Product Manager, Nextleap | Certified Business Analyst, AnalytixLabs
